Welcome to Irrigation & Lighting magazine's Industry Outlook Survey. This year's survey builds on the trends of past years while introducing some changes that will make it an even better tool for industry professionals.

The largest change is one of timing, moving the survey itself to later in the year. This allows readers to put this survey to better use by supplying this new data when many are starting to slow down or end the season and begin developing business plans for the next 12 months. The new publication date better fits when industry professionals will need the data to benchmark their businesses. Providing the survey later in the season also reduces the need for respondents to make estimations on totals that haven't come in yet, making this data even more accurate. Changing the timeline to a busier point in the season didn't make a significant difference in the number of respondents, however. This year's survey boasts a total of 1,371 respondents, with more than half of those representing industry contractors. This continues to make this survey a close-up, reliable picture of what concerns, challenges and opportunities professionals in the field run into on a day-to-day basis. We can't thank our readers enough for their time and insights shared in this survey, especially after their help earlier in the year for the 2022 Industry Outlook Survey.

Next, we're continuing to add more specific questions for both irrigation and landscape lighting professionals. These help develop a picture of what each of these market segments look like compared to the wider market. Whether a contractor specializes in irrigation or landscape lighting, or just provides them as one of their offered services, these results will help shape their outlook on the market for the upcoming year.

This year's survey saw industry professionals continuing to try to get as large a slice as possible of the expanded market still coming off of the pandemic. In a lot of ways, this year felt like more of the same from the previous year with a slow tapering of expectations. There were opportunities for growth, and some industry professionals were able to bring all the elements together to build.

Our survey followed readers as they worked to get everything they could out of a busy market despite any one of many possible constraints. It tracked continued change to demographic and labor trends such as minimum job costs, crew compensation and enhanced business expectations, while dealing with supply chain issues. It covered huge legislative and weather impacts that were fully out of any contractors' hands, such as increased drought restrictions in California and Hurricane Ian's impact on the East Coast.

Once again, we'd like to thank Heritage Landscape Supply Group for its ongoing support of this project. This year, Heritage provided a DJI Mini 2 quadcopter and a Solo Stove Bonfire fire pit as the two drawing prizes for completing the survey.

As the season closes, whether you're expanding your business or making the best of a constrained market, our report will help you see the landscape clearly. Use these results to build your best plan for the upcoming year.
A closer look at demographics

Many of the demographic indicators remained steady between the 2022 and 2023 surveys. A majority of all respondents are executives at exactly the same percentage as last year (44%), with nearly the same number of managers (33%). The number of those who consider themselves to be primarily specialists increased to 15%, up from 12% the previous year. For those respondents who are contractors, a total of 88% are either the executive or manager, similar to last year.

A total of 32% of respondents have personally worked in the green industry for more than 31 years. Another 45% land between 11 and 30 years, continuing the trend of well-established professionals in the industry with comparatively few newcomers. The story is similar when asking about respondents’ age as well, as the group of those older than 50 (52%) is larger than all other groups combined (48%). Only 6% of respondents are under the age of 30.

Some new demographics questions were included this year, finding that 85% of respondents are white or Caucasian, with those with Hispanic or Latino background making up the next largest group at 9%. A total of 86% of respondents are male and 14% are female.

Contractors continue to make up the largest group of survey respondents, totaling 64% compared to any others, almost exactly matching last year’s total of 63%. Irrigation contractors are the largest group of respondents, maintaining their lead on landscape contractors for the second year running.

Which of the following services does your business provide?

- 72% Irrigation design and installation
- 71% Irrigation maintenance
- 54% Landscape design and installation
- 49% Drainage
- 46% Lawn maintenance
- 44% Turf and landscape renovation
- 42% Landscape lighting design and installation
- 40% Hardscaping
- 36% Disease, insect and weed control
- 35% Chemical application
- 33% Tree and ornamental care
- 31% Water features
- 29% Environmentally friendly services
- 26% Snow/ice management
- 19% Hydroseeding/erosion control
- 14% Holiday lighting

How long has your business been operating?

- 51 years or more: 17%
- 41-50 years: 11%
- 31-40 years: 18%
- 21-30 years: 19%
- 11-20 years: 17%
- 6-10 years: 8%
- 3-5 years: 5%
- 2 years or fewer: 5%

What is your business’s ownership structure?

- Family owned: 48%
- Privately held: 33%
- Government: 17%
- Publicly traded: 3%

How many locations does your business have?

- 1 location: 18%
- 2-5 locations: 18%
- 6-10 locations: 11%
- 11 or more locations: 69%

Do you charge for estimate and proposal services?

- Yes: 74%
- No: 13%
- I don’t provide estimate or proposal services: 13%
What is your preferred minimum installation job cost?

What is your gender?

- Male: 86%
- Female: 14%

What is your race or ethnicity?

- White or Caucasian: 85%
- Hispanic or Latino: 9%
- Asian or Asian American: 1%
- Black or African American: 1%
- Another race: 2%
- American Indian or Alaska Native: 1%
- Native Hawaiian or other Pacific Islander: 1%

In what region is your business primarily located?

- Northeast: 41%
- Southeast: 17%
- Upper Midwest: 16%
- Lower Midwest: 14%
- West: 12%
Coming to the end of the season, respondents are slightly less excited as they were at the beginning of the year. With the warm summer months behind them, 27% expected flat returns or a decrease overall compared to 23% last year. Roughly the same amount expected moderate growth this year (51%) compared to last year (52%), so that elasticity may have pulled a little bit away from those looking for exceptional growth.

But they're definitely just as optimistic as the previous year, as none of the results for that question have shifted by more than a point or two between surveys. Respondents appear to think that there's still more to get out of the market if they can get the right tools.

For another year running, a struggle to find the right labor is the top barrier to getting a larger slice of that market (69%). More respondents reported that economic conditions are pushing back on them as well at 45% compared to last year’s 39%.

Benefits and employee compensation extended its lead as one of the top expenses for respondents from 55% to 62%. Supplies remained about the same at 44%, but fuel and energy jumped from 29% to 38%.

Respondents say they struggle most with regulation surrounding labor (32%), fuel (25%) and water (24%). About a quarter of all respondents (24%) have contacted their local or state representatives about industry issues in the past three years.

### Compared to 2021, how much do you expect your business has grown in 2022?

- Decrease: 7%
- Flat: 20%
- 1%-5%: 23%
- 6%-10%: 11%
- 11%-15%: 11%
- 16% or more: 11%

### What is your business’s projected gross revenue for 2023?

- Less than $100,000: 16%
- $100,001-$500,000: 21%
- $500,001-$1 million: 26%
- $1,000,001-$5 million: 9%
- $5,000,001-$10 million: 13%
- More than $10 million: 13%

### What barriers most impact your business growth?

- Labor shortage: 45%
- Economic conditions: 34%
- Insurance/employee compensation: 31%
- Supply chain issues: 21%
- Low profit margins: 18%
- Too much competition: 14%
- Drought/water shortage: 14%
- Regulations: 10%
- Negative industry perceptions: 9%
Regardless of what part of the green industry respondents come from, bringing in and keeping staff was one of the toughest challenges this season. For another year running, fewer respondents say their region offers enough qualified workers to meet their needs (31%). While hiring is still a struggle, teams are slightly larger this year compared to last. Fewer companies this year report between 1-5 employees (33% compared to 38%) as most of the other ranges grew by about 1%.

Breaking out survey responses regarding labor, some additional trends appear related to whether or not an employer reports being able to find enough workers. For the second year running, employers who report being able to find enough workers tend to have a more racially and gender-diverse workforce, though the split is roughly the same. They more often have a policy or program related to developing a diverse team (68% compared to 56%). Another fairly reliable marker for whether an employer can find enough employees is whether they have a mentorship or career path plan for staff (45% compared to 37%). Both groups pay roughly the same wages for crew members and encourage additional training and licensing, making it seem more likely that what brings employees in and keeps them around is livable wages, a culture fit and the promise of a path forward. With 80% of respondents bringing in employees under the age of 30, the next reliable crew leader or operations manager could be already on the team just waiting for an experienced boss to show them how to make the most of the job. Make sure they don’t head to another career opportunity that shows them more of a future.

---

**During peak season, how many full-time equivalents are employed by your business?**

<table>
<thead>

**Does your business have a policy or program related to employee diversity?**

- Yes: 60%
- No: 40%

**Does your region offer enough qualified workers to meet your company’s needs?**

- Yes: 31%
- No: 69%

**On average, what does your business pay its crew members?**

- $11 per hour or less: 3%
- $12-$14 per hour: 5%
- $15-$17 per hour: 20%
- $18-$20 per hour: 28%
- $21-$23 per hour: 20%
- $24 or more per hour: 23%

---

Have you established a mentorship or career path program for your employees?

- Yes: 39%
- No: 61%

Have you increased your average pay for crew members in the past year?

- Yes: 82%
- No: 18%

Do you offer monetary bonuses or incentives to crew members?

- Yes: 63%
- No: 37%

Total percentage of respondents supporting additional licensing and training: 88%

Total percentage of respondents who employ Spanish-speaking workers: 73%

Total percentage of respondents with racially diverse employees: 69%

Total percentage of respondents with gender-diverse employees: 69%
How many of your employees are under the age of 30?

- None: 20%
- 1%-25% of employees: 32%
- 26%-50% of employees: 32%
- 51%-75% of employees: 13%
- 76%-100% of employees: 3%

How often does your business perform crew safety checks/training?

- Daily: 16%
- Weekly: 19%
- Monthly: 21%
- Seasonally: 27%
- Never: 17%

Total percentage of respondents using job management apps/software: 57%

Do you have at least one employee dedicated to sales?

- Yes: 50%
- No: 50%
Future » Future change

While it was another reliable growth year for most respondents, more are predicting moderate decline this year (12%) than last year (7%). That deflation pulls almost fully from the group that expected significant growth (14% compared to 18% last year). While it’s a small shift overall, there seems to be a sense among respondents that continuing growth at all into next year will be a challenge.

Breaking out survey responses concerning expectations about the future, some additional trends appear based on how well their companies grew over 2022. Respondents who reported flat or decreased change over 2022 expect moderate decline in demand next year at almost twice the rate (26%) of the standard group. It may come as no surprise, but the reverse is also true of this group. Those who reported growth of 11% or more expect significant growth in 2023 by more than twice (34%) the standard. It sounds as though if the past year treated respondents well, they expect the next one to be even better, but things look significantly gloomier for those who struggled this year.

How do you rate the expected growth in demand for your business’s services in 2023?

- Significant growth: 72%
- Moderate growth: 14%
- Moderate decline: 12%
- Significant decline: 2%

Which of the following services is your business considering expanding or adding in 2023?

As individual markets, irrigation and lighting have continued to see growth in the past year compared to landscaping as a whole. For the 2022 season, those who offered irrigation services expected growth (75%) slightly more than the average (73%). Those who offered landscape lighting services were even more optimistic at 80%.

The overall number of respondents working in either market hasn’t shifted drastically over the season. Almost exactly the same number of respondents are in irrigation services as in last year’s survey (73%), and the same held true for those providing landscape lighting services (48%).

One of the new questions this year found that if a respondent does irrigation work, it more often makes up less than half of the company’s overall services (56%). Compare that to the landscape lighting market, which has a full 80% of respondents who say it makes up less than a quarter of their overall services. When asked about which services respondents expect to add in 2023, irrigation (27%) and landscape lighting (19%) rank among the highest options, but it doesn’t look like most respondents are focusing their entire businesses around them.

Slightly more irrigation professionals say the market for system upgrades and retrofits has remained the same or slowed (57%) compared to last year (51%). That cooperates with the increase in respondents who say that at least a quarter of their customers use smart controllers (51%) compared to last year (44%).

For landscape lighting professionals, the retrofit market has either remained the same or slowed (81%) at a much higher rate compared to last year (60%). It sounds as though if professionals are looking for work in landscape lighting, they’re better off learning to design and install new systems.

Kyle Brown is the editor-in-chief of Irrigation & Lighting and can be reached at kylebrown@irrigation.org.
The 2023 Green Industry Outlook Survey was developed in SurveyMonkey with three email invitations including individual, anonymous links sent to respondents between Sept. 19 and Oct. 7. Responses gathered were checked for duplicates and relevance to the survey. Each invitation included information on the drawings for a DJI Mini 2 quadcopter drone or a Solo Stove Bonfire fire pit, provided by Heritage Landscape Supply Group. Survey results were closed Oct. 9 with 1,371 responses. Irrigation & Lighting staff analyzed the survey results.

How has the demand for landscape lighting services changed this year?

- 57% Yes
- 20% No
- 15% 5% No
- 5% 2% Yes

- Demand has greatly increased.
- Demand has remained about the same.
- Demand has increased.
- Demand has decreased.
- Demand has greatly decreased.

How has the demand for landscape lighting upgrades or retrofits changed in the last year?

- 64% Yes
- 18% No
- 18% 1% No
- 5% 2% Yes

- Demand has greatly increased.
- Demand has remained about the same.
- Demand has increased.
- Demand has decreased.
- Demand has greatly decreased.

What percentage of your irrigation customers currently use smart controllers?

- 49% Yes
- 26% No
- 13% 12% No
- 5% 4% Yes

- 25% or fewer
- 26%-50%
- 51%-75%
- 76% or more

Have you discussed drought issues with your customers in the past year?

- 63% Yes
- 37% No

- 37% Yes

- 63% No

- 49% Yes

- 51% No

- 4% No

What percentage of your overall services are focused on landscape lighting?

- 80% Yes

- 14% No

- 2% 2% No

- 5% 4% Yes

- 25% or fewer
- 26%-50%
- 51%-75%
